

YOUR COLOR CARE GUIDE

Spray Tanning

Confirm your solution and assigned rinse time. Standard and rapid tans have different instructions.

Follow your provider's personal instructions if they differ from this guide.

01 BEFORE AND JUST AFTER

- The night before, shave, exfoliate, and moisturize as instructed. Wear dark, loose clothing afterward to limit rubbing and guide-color transfer.
- Rinse hands about 1 hour after treatment as directed. Keep the remaining tan undisturbed until your assigned full-body rinse.

02 YOUR FIRST RINSE

- Standard tan: rinse within 8-24 hours. Rapid tan: 3-5 hours. Follow the specific time assigned. Shower briefly with lukewarm water, without soap, scrubs, or a loofah.
- Guide color and small speckles wash away. Color develops over roughly 6-8 hours and may continue after a rapid rinse; this does not change your assigned rinse time.

03 MAINTAIN COLOR SAFELY

- Pat dry instead of rubbing. After the first rinse, moisturize as directed and ask which products suit your tan.
- A spray tan does not replace sunscreen. Use separate broad-spectrum SPF 30+, shade, and protective clothing.
- For future spray applications, protect eyes, lips, and mucous membranes. Avoid inhaling or swallowing spray; report prior reactions.

WHEN TO GET HELP

Call Beauty Lab + Laser for rash or persistent irritation. Seek prompt medical care for eye irritation, cough, or wheezing after spray exposure. Severe breathing symptoms need emergency care.

Call 911 for trouble breathing, throat or tongue swelling, or collapse.
