Tox

Follow these notes and any personalized instructions after toxin treatment, including a lip flip or specialty appointment.

Follow your provider's personal instructions if they differ from this guide.

01 THE FIRST DAY

- For at least 1 hour, avoid ice, rubbing, massage or pressure on treated areas, following Beauty Lab's protocol.
- Stay upright for 4-6 hours. Avoid strenuous exercise, saunas, hot tubs and overheating for at least 24 hours.

02 GENTLE CARE

- Keep injection points clean; ask when makeup or facial treatments can resume. Small bumps, bruising, tenderness or a mild headache can occur.
- Ask about suitable pain relief. Tell your provider about muscle relaxants or new medicines; do not stop prescribed medicines yourself.

03 ALLOW TIME

- Effects develop gradually. Allow about 10-14 days for your planned review; timing varies by product and area.
- Contact us about persistent asymmetry or eyelid or brow changes. Have the result assessed before arranging more toxin.

WHEN TO GET HELP

Call [911](tel:911) for trouble breathing, swallowing or speaking, or tongue or throat swelling. Serious toxin effects can appear hours to weeks later.

Get medical help immediately for new widespread weakness or double or blurred vision. Do not drive yourself.

Call [801-281-3223](tel:801-281-3223) promptly for increasing pain, redness, fever or unexpected symptoms. If severe or help is unavailable, seek urgent medical care.

QUESTIONS? CALL YOUR TREATMENT LOCATION.
